## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Weisman et al (US Patent Application Publication, Pub. No.: US 2004/0047461 A1).
2. In regards to claims 1 and 9, Weisman discloses a method and system for providing pre-paid multi-party conference services (See page 14, paragraph [0178]), the method and system, comprising the steps of: initiating a conference call (See page 1, paragraph [0001]; page 9, paragraph [0130]; and page 10, paragraph [0139]); receiving a first destination number (e.g., desired list of conference participant(s), such as friends, participants sharing a common interest, etc.) from a first device (e.g., conference initiator/creator/moderator) (See page 9, paragraph [0132] and page 10, paragraph [0139]); receiving a first code (i.e., indication of whether or not to allow the participant to join the conference based on a shared common interest or the decision may be based on access criteria) from the first device specifying whether to include the destination number to the conference (See page 10, paragraph [0139] and page 15, paragraph

[0195]); and including the first destination number to the conference call based on the first code (See page 10, paragraph [0139] and page 15, paragraph [0195]).

3. In regards to claims 2 and 10, Weisman discloses the method and system, wherein the first code is reject code (i.e., indication that the participant does not share a common interest or does not have proper access criteria) specifying the exclusion of the first destination number to the conference call (See page 10, paragraph [0139] and page 15, paragraph [0195]).

4. In regards to claims 3 and 11, Weisman discloses the method and system, wherein the first code is an accept code (i.e., indication that the participant does share a common interest or does have proper access criteria) specifying the inclusion of the first destination number to the conference call (See page 10, paragraph [0139] and page 15, paragraph [0195]).

5. In regards to claims 4 and 12, Weisman discloses the method and system, further comprising providing a prompt requesting the first destination number (for example, the system request from the conference initiator/creator/moderator, a list of desired conference participant(s), such as friends, participants sharing a common interest, etc.) (See page 9, paragraph [0132] and page 10, paragraph [0139]).

6. In regards to claims 5, 6, 7, 8, 13, 14, 15, and 16, Weisman discloses the method and system, further comprising receiving a second code from the first device specifying whether to initiate the addition of another destination number to the conference call (See page 15, paragraph [0193] – [0195]).

7. In regards to claim 17, Weisman discloses the system, further comprising a network, coupled to the system, operable to transmit voice and data communication (See page 6-7, paragraph [0101] – [0102] and page 7-8, paragraph [0111] – [0112]).
8. In regards to claim 18, Weisman discloses the system, wherein the network is a PSTN (e.g., switched telephone network) (See page 6-7, paragraph [0101] – [0102]).
9. In regards to claim 19, Weisman discloses the system, further comprising at least two devices, coupled to the PSTN, operable to provide voice and data (See page 6-7, paragraph [0101] – [0102]).

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gavish et al (US Patent Application Publication, Pub. No.: US 2004/0047342 A1) teach multipoint multimedia/audio conference using IP trunking. Weisman et al (US 6,839,417) teach a method and apparatus for improved conference call management. Campbell, IV et al (US 5,903,629) teach an apparatus and method for automated audio teleconferencing having enhanced reconfiguration features.
11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thjuan P. Knowlin whose telephone number is (571) 272-7486. The examiner can normally be reached on Mon-Fri 8:30-5:00pm.
12. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wing Chan can be reached on (571) 272-7493. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

13. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
